Summary

Full stack developer responsible for the creation and maintenance of many web systems.

Seeking to always use the best technologies and most efficient conventions, I managed to develop stable, efficient and easily maintainable and expansive applications.

Skills

Languages	TypeScript, JavaScript, C#, SQL, HTML, CSS, Sass, Python.
Frameworks	React, .NET, Express.js, React Native.
Misc.	Git, Docker, Material UI, Redux, Swagger, Linux, Scrum, Kanban.
Speaks	Fluent Portuguese.

Work Experience

Full Stack Developer Radix Engineering and Software (Oct/2021 - Current)

- Systems for managing collaborators, projects, customers and finances.

Full Stack Junior Developer Grupo Unicad (Jan/2021 - Sep/2021)

- Mobile application for tracking vehicles, receiving routes to follow and receiving alerts when entering risk zones or leaving the specified route.

- Managing center for tracking vehicles, receiving and justifying automatic alerts and generating telemetry from customers using the app above or their own tracking systems.

- Web and mobile system for automatically alerting important people about dangerous areas, besides being able to send mass or individual notifications to them.

- Creation and maintenance of systems shared by all the systems above.

Internal Internship UERJ (Dec/2018 - Nov/2020)

- Web system for managing the enrollment of students in a graduate course while also doubling as their introductory website.

Education

Studying Computer Science at the State University of Rio de Janeiro (UERJ).
